## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention.

Due to the number of combinations of variables involved in the claims, (e.g. R, R1, X, L, L1, Z, Q, etc.) and their widely divergent meaning, a precise listing of inventive groups cannot be made. Illustrative of the different inventive concepts may be made by reference to specific examples (e. g. compounds):

the compound of

- I. Example 1
- II. Example 2
- III. Example 3
- IV. Example 4
- V. Example 5
- VI. Example 6
- VII. Example 7, etc.

2. Applicant is required under 35 USC 121 to elect a single disclosed species from under the instant claims.

Art Unit: 1617

3. With the election of a specific exemplified Example (e.g. compound) a generic concept will be identified if possible, by the examiner as the inventive group for examination;  
or

If desired upon election of a single compound, applicants can review the claims and disclosure to determine the scope of the invention and can **set forth** a group of compounds which are so similar within the same inventive concept and reduction to practice. Markush claims must be provided with support in the disclosure for each member of the Markush group. See MPEP 608.01(p). Applicant should exercise caution in making a selection of a single member for each substituent group on the base molecule to be consistent with the written description.

4. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1617

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
